Canadian firm opens steel manufacturing facility in Bethlehem

Stacy Wescoe//March 6, 2024//

DCM Metals Corp., a Canadian steel framing manufacturing company, has moved into a J.G. Petrucci Co. Inc. property in Bethlehem.

This is the company's first location in the United States according to Petrucci.

DCM has signed a 46,500-square-foot lease at 2156 City Line Road.

DCM will use the space for steel stud manufacturing and will feature six roll form lines, and approximately 2,300 square feet of finished office space.

The move positions DCM Metals to capitalize on the booming Lehigh Valley market and its proximity to major transportation corridors.

"Welcoming DCM Metals Corp. to 2156 City Line Road as their first U.S. location marks another chapter in our story of forging strong partnerships with international manufacturing companies. We are confident they will make a significant impact on the region's manufacturing landscape," said Kerry Wrobel, president at LVIP Inc.
